Applicant NEOPERL GMBH									
 This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36. This REPORT consists of a total of sheets, including this cover sheet. This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT). These annexes consist of a total of 7 sheets.

D1: DE 198 34 902 A (GUTZEIT THEODOR) 11 February 1999 (1999-02-11)

- 1) D1, which is considered the closest prior art, discloses a sanitary fitting with a double-walled housing, the inner housing wall being designed as a membrane consisting of a flexible material.
- The subject matter of claim 1 differs therefore from that of D1 in the radial arrangement of the flexible housing wall relative to the rigid housing wall and the associated mode of operation in the event of pressure compensation.
- The problem addressed by the present invention can therefore be considered that of producing a sanitary fitting as described above that can be inserted into a sanitary water pipe in a fluid-tight manner using simple means.
- The flexible housing wall of D1 is situated, in contrast to that of claim 1 of the application, radially on the inside. The fluid-tight use of the

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP 03/13910

fitting shown in D1 in a sanitary water pipe is not readily possible. In addition, as a result of the externally arranged, flexible housing wall according to claim 1, the mode of operation of the fitting as per the invention differs in the event of pressure compensation from the mode of operation of D1 in the manner described in the last seven lines of claim 1.

None of the citations discloses a solution as per claim 1 or suggests combining two or more disclosures so as to arrive at the claimed invention. The subject matter of claim 1 is therefore inventive, as is the subject matter of dependent claims 2 to 9.

Note

The present claim 1 is based on the original claim 1 in combination with the original claim 2 and on page 3, paragraph 1 of the original description.
